# Inclusiveness and Accessibility Index

---

On December 3, 2015, on International Day of Persons with Disabilities (PwDs), the Government of India launched the “Accessible India Campaign” (Sugamya Bharat Abhiyan). A nationwide campaign for achieving universal accessibility for PwDs and to create an enabling and barrier free environment, it focusses on three verticals: Built Environment; Public Transportation and Information & Communication Technologies.

As part of this campaign the Department of Empowerment of Persons with Disabilities (DEPwD), Ministry of Social Justice and Empowerment, GoI in collaboration with Federation of Indian Chambers of Commerce and Industry (FICCI) have introduced an index, to measure inclusiveness and accessibility of PwDs across different kinds of organisations. The composite index is split into two independent sub-indices that separately measure inclusiveness, and accessibility (I&A).

The Inclusiveness and Accessibility Index (I&A Index) or toolkit is not a substitute for the legal obligations that exist under national or international regulatory regimes. It aims at assessing the current stage of inclusiveness and accessibility of PwDs in an organisation and also acts as a guide for taking progressive steps to increase support, inclusiveness and accessibility towards persons / employees with disabilities.

The toolkit is based on research, and the best examples and experiences of organisations that have taken initiatives to increase accessibility of PwDs and have benefited from such initiatives. It is driven by the key principles of:

- ✓ The UN Convention on Rights of Persons with Disabilities (UNCRPD);
- ✓ The ILO Code;
- ✓ National and international standards that promote accessibility and inclusiveness of PwDs.

A holistic approach has been adopted while preparing the toolkit so that it may be applied and used by organisations irrespective to their size and scale. As an organisation increases in size or becomes more sensitive towards adopting practices to increase accessibility towards PwDs, the framework will be able to easily capture such progress and it will be reflected in the ratings. The elements of the toolkit take into consideration the impact of an organisation's actions in ensuring inclusiveness and accessibility for PwDs, not only on its internal dynamics but also in its interactions with the outside world.

To facilitate measurement of this index, a questionnaire has been designed to assess an organisation's standing on the I&A Index. The questionnaire is designed to enable the assessor to give appropriate ratings to individual organisations that choose to be assessed.

The questionnaire also has two sections applicable to the two indices: Inclusiveness and Accessibility. Each section has three key components. Questions can be easily answered by an organisation by ticking the appropriate parameters that are applicable. However, care must be taken that each 'tick' mark is substantiated with credible evidence.

Participation / using this index/toolkit is purely voluntary and based on an individual organisation's desire to be measured on the index, to understand where they stand in terms of inclusiveness and accessibility of PwDs.

## INCLUSIVENESS AND ACCESSIBILITY INDEX

| INCLUSIVENESS SUB-INDEX |   |   |   |   |   |                   |
|-------------------------|---|---|---|---|---|-------------------|
| Component               | Scale   | 1 | 2 | 3 | 4 | Component Ratings |
| <b>A</b>                | <b>INCLUSIVE POLICIES AND ORGANISATIONAL CULTURE</b>        |   |   |   |   |                   |
| A.1                     | Equal Opportunity and Top Management Commitment             |   |   |   |   |                   |
| A.2                     | Organisational Policies and Culture                         |   |   |   |   |                   |
| A.3                     | Corporate Social Responsibility (CSR)                       |   |   |   |   |                   |
| A.4                     | Inclusiveness in the Supply Chain                           |   |   |   |   |                   |
| <b>B</b>                | <b>INCLUSIVE EMPLOYMENT</b>                                 |   |   |   |   |                   |
| B.1                     | Percentage of Employees with Disabilities                   |   |   |   |   |                   |
| B.2                     | Career Growth   |   |   |   |   |                   |
| B.3                     | Penetration of Employees with Disabilities across Functions |   |   |   |   |                   |
| B.4                     | Types of Disabilities Accommodated                          |   |   |   |   |                   |
| <b>C</b>                | <b>AWARENESS AND ADAPTATIONS</b>                            |   |   |   |   |                   |
| C.1                     | Workplace Adaptations                                       |   |   |   |   |                   |
| C.2                     | Awareness and Sensitisation Programmes                      |   |   |   |   |                   |
| C.3                     | Grievance Redress   |   |   |   |   |                   |
| C.4                     | Social Inclusion  |   |   |   |   |                   |

## Methodology

The toolkit is designed as a maturity model with measurable steps defined as 'indicators' to enable an organisation to progressively improve its ranking on the Inclusiveness and Accessibility Index.

The methodology for determining the position of an organisation on the inclusiveness and accessibility index is as follows:

- Each of the sub-indices Inclusiveness and Accessibility have equal weightage in the composite index.
- Both Inclusiveness and Accessibility sub-indices have 3 components each. Each of these three components have equal weightage in the related index.
- The Inclusiveness and Accessibility sub-indices, therefore, are computed by calculating the average of the sub-component rating scores.
- Each sub-component has various indicators which carry specific rating points. The rating for these indicators at a particular rating scale (1 to 4) add up to 1. For example, if an organisation complies with only one indicator at rating level 2 of a sub-component, then, the rating for that sub-component is 1 plus the value of that indicator in the rating scale of level 2 of that sub-component.
- The columns signifying ratings of sub components (ranging from 1 to 4 on the level of performance) are not mutually exclusive and each successive rating is built on the previous level.

Rating each component and their sub-component is based on three dimensions:

- Availability of an approach or a policy or an SOP evidencing the answers to the questionnaire;
- The degree of implementation; and
- The outcomes or results.

Information in this regard would therefore need to be provided by the organisation being assessed. **Care must be taken to ensure that each 'tick' mark is substantiated with credible evidence.**

The following table describes the indicators or the criteria to be fulfilled by an organisation at each level to meet the expectations of inclusiveness and accessibility for persons with disabilities. Each of the levels have been categorised based on indicative and relative parameters, and provides a broad guidance for measuring inclusiveness and accessibility levels in an organisation and also enables tracking progress over time.

| Particulars  | Index |
|--|-------|
| Inclusiveness and Accessibility Index (Average of the two Sub-Indices) | XX    |
| Inclusiveness Sub-Index (Average of A, B and C)                        | XX    |
| Accessibility Sub-Index (Average of D, E and F)                        | XX    |

Scale:

Up to 1: Needs Significant Improvement

Up to 3: Good

Up to 2: Average

Up to 4: Excellent

# Inclusiveness and Accessibility of Persons with Disabilities (PwDs)

---

The Government of India on 3rd December, 2015 launched the “Accessible India Campaign” (Sugamya Bharat Abhiyan) as a nation-wide flagship campaign for achieving universal accessibility of PwDs. The vision is to have an inclusive society in which equal opportunities and access is provided for the growth and development of PwDs to lead productive, safe and dignified lives.

As a part of the “Accessible India Campaign,” the Department of Empowerment of Persons with Disabilities (DEPWD) in collaboration with the Federation of Indian Chambers of Commerce and Industry (FICCI) have developed an index, to measure inclusiveness and accessibility of PwDs across different kinds of organisations. The composite index is split into two independent sub-indices that separately measure inclusiveness, and accessibility.

The index or toolkit is not a substitute for the legal obligations that exist under national or international regulatory regimes. It aims at assessing the current stage of inclusiveness and accessibility of persons with disabilities (PwDs) in an organisation. It also acts as a guide for taking progressive steps to increase support, inclusiveness and accessibility towards persons/ employees with disabilities.

To facilitate measurement of this index, a questionnaire has been designed to assess an organisation's standing on the Inclusiveness and Accessibility Index of PwDs. The questionnaire is designed to enable the assessor to give appropriate ratings to individual organisations that choose to be assessed.

Just as the index is divided into two sub-indices, the questionnaire also has two sections applicable to the two indices: Inclusiveness and Accessibility. Each section has three key components. Questions can be easily answered by an organisation by ticking the appropriate parameters that are applicable. However, care must be taken that each 'tick' mark is substantiated with credible evidence.

Participation in this exercise is purely voluntary and based on an individual organisation's desire to be measured on the index, to understand where they stand in terms of inclusiveness and accessibility of PwDs.
